

ABHAY SHARMA

SOFTWARE DEVELOPER

Bareilly, Uttar Pradesh, India | abhay.shar107@gmail.com | +917302281167 | [Portfolio Website](#)

SUMMARY

Software developer with 4+ years building **high-performance** Angular web apps and Node.js backends. I design and ship full-stack features (UI → API → storage) for **realtime and media-heavy products** — CDNs, fintech flows, and a self-hosted music platform. I focus on performance, signed-URL security (Cloudflare R2), and developer-friendly infrastructure. Looking for a **senior/frontend-oriented role** where I can own feature delivery and **mentor engineers**.

TECHNICAL SKILLS

Angular	MongoDB	Real-time Communication
TypeScript	Cloudflare R2	UI/UX & Animations
Node.js & Express.js	Self-hosting & Networking	AI & LLM Integration

PROFESSIONAL EXPERIENCE

ScoreMe Solutions Private Limited | Software Engineer

Aug 2025 - Present

- Created multiple fintech products like Bank Statement Analysis, ITR and GST
- Worked with multiple banks on their journeys, like Vehicle Loan, Gold Loan, and Personal Loan
- Collaborated with multiple team members, ensuring smooth delivery of products

5centsCDN | Web Developer | Team Lead

Aug 2023 - Aug 2025

- Analysed and optimised app performance from page taking loadtime from 1 min to 0.5 seconds by lazy-loading critical assets and optimising bundle splits
- Identified performance-critical bugs and collaborated with the team to resolve them.
- Led the 5-engineer team in aligning on product requirements and resolving conflicts.
- Integrated third-party libraries like Video.js, Chart.js, and Resumable.js making multiple file update 76% faster and reliable

QBH Private Solution LTD | FullStack Developer

Mar 2023 - July 2023

- Build ERP software
- Worked on Angular, NestJS and SQL database

Kodekrew Technologies | Angular Developer

Apr 2022 - Dec 2022

- Build UIs from wireframe & prototype
- Found bugs in UI and fixed them
- Build forms, validate data & create a robust end-to-end application

Vibencode | Angular Developer

Sep 2021 - Dec 2021

- Developed a full frontend based on the provided designs.
- Implemented key frontend functionalities and integrated backend APIS.
- Write unit test cases covering 85% of the codebase, ensuring reliable delivery of software

PERSONAL PROJECTS

- Music Streaming App** — Built full system: Node.js + Express backend, Angular UI, Cloudflare R2 storage with signed URLs, and self-hosted deployment.
- Temp & Humidity Monitor** — Created hardware + backend + realtime dashboard to track and display live sensor data.
- Local LLM Workbench** — Ran multiple models locally (Text Gen Web UI), integrated them into custom tools, and tested on-device inference pipelines.

EDUCATION

BCA, Bareilly College (2020–2023) – Final project: [BookBridge](#) (student networking app)
